Cons of Glass-Glass PV Modules Installation constraints. Special clamps and racks are needed for glass-glass PV modules. To ensure that glass on glass PV modules is properly supported without damage, careful calculations must be performed to determine the best mounting position. Lack of expertise is the other major constraint.

Single-glass solar modules, as the name suggests, are made of a single layer of glass on the front of the module. This design is the traditional and most common configuration for solar panels. Double glass solar modules, on the other hand, have an additional layer of glass on the back of the module, providing enhanced durability and protection.
