

Special containerized generator set

What are the different types of containerized diesel generator sets?

The containerized diesel generator sets produced by Dingbo Electric Power are divided into standard and silent types, using a standard container structure box with built-in diesel generator sets and dedicated complete sets of equipment and accessories.

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments - validated at ambient temperatures of up to 55 degrees Celsius.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Why should you choose a container diesel generator set?

3. Convenient transportation and cost saving. The appearance of the container diesel generator set is in the standard size of a container, and there is no need to book a dedicated container space during sea transportation, greatly saving transportation costs. 4.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

Find your containerized generator set easily amongst the 314 products from the leading brands (, GELEC, Grupel, ...) on DirectIndustry, the industry specialist for your professional purchases. ... The generator set and its components are prototype-tested, factory-built, and production-tested. The 60 Hz generator set offers a UL 2200 listing.

Special containerized generator set

LONGKAI POWER is a professional manufacturer of Diesel Generator Set, Chinese Generator, Silent Generator with complete variety, guaranteed quality, and trustworthiness. ... China. Now Longkai supplies generating sets ranging ...

SinoGen is the leading Chinese generator set brand that focusing on the silence type and super silence type generator set that powered by Cummins, Deutz, Perkins, Weichai and CAMC engines. ... SinoGen producing ultra-strong ...

Robust Performance-Fully integrated containerized generator set is optimized for diverse critical power requirements regardless of environmental conditions.; Cummins heavy-duty QSK60 engine - Proven performer, rugged 4-cycle industrial diesel delivers reliable power, low emissions, and fast response to load changes.; Flexible Layout - Stackable design allows for smaller footprint, ...

Special Designed Containers (optional) 7000*2300*2500. 12192*3000*2896. 13500*3000*2896. 15000*3200*3000. Remarks: other customized container designs are available. Noise Level ... The containerized generator set has the functions of rainproof, dustproof and anti-corrosion, which is very suitable for outdoor applications. ...

Special Offers. Petrol Generators For Sale. Water Pumps. By kVA. 0-100 kVA. 10KVA Generator For Sale. 20KVA Generator For Sale. 30KVA Generator For Sale. ... our containerized generators are designed to meet the demands of various applications. Our standard container range includes key features for optimal performance and safety, such as:

Generator manufacturers generally recommend that a generator should be serviced after the first year of installation and on an annual basis there on after.
