

Is your building management system (BMS) future-ready?

If your building management system (BMS) is not future-ready, you're missing out on advances in technology and IoT-enabled devices that make it possible to meet sustainability targets, lower operating costs, enhance occupant experience, improve productivity, and increase building value. of the world's energy is used in buildings.

What is BMS & why is it important?

By integrating a wide range of data from each subsystem, such as Electrical system, Elevator/Escalator, HVAC, Lighting control system, Security system, Fire alarm system and Sanitary system, under BMS on one platform, it facilitates the realization of managing building effectively, assuring security certainly and saving energy dramatically.

What is SCADA & BMS?

SCADA (Supervisory Control And Data Acquisition), which composes BMS as a major software, helps owners and managers of buildings solve issues by centrally monitoring and controlling various equipment and facilities in large-scale buildings.

By then, it can provide clean electricity for Thai people with constant power, help improve the overall stability and security of Thai power grid, and quicken Thai's step to realize the National 4.0 Strategy. Its completion also opens a new phase for Sungrow's long-term strategic progress in the Solar and Energy Storage field in Southeast Asia.

Thai Outdoor Group (TOG) ... Moreover, The North Face is proudly selected to showcase in King Power Duty Free's airport and downtown branches. The North Face has also recently employed several types of e-Commerce, namely Market Place, Social Commerce, and Dot Com. With over 40 points of sales throughout Thailand, it is evident the E-commerce ...

Outdoor Telecom Power Solution The outdoor telecom power system integrated with the high efficiency rectifier, intelligence controller and advanced thermal cooling system. Besides, the cabinet also comply with IP55 - Less water penetration and Less dust ingress.
