How many PV modules are in a solar container?

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ecologically-friendly aluminium rail system guarantees a mobile solution with rapid availability. at full power.

What is a solarfold photovoltaic container?

at full power. The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into its operating position rapidly and smoothly along a length of around 123 metres.

What is a self-unloading mobile solar container?

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work.

What is a folded solarcontainer?

Folded Solarcontainer is compact and easy to off-load and unloadBy removing all outer structural parts we ensure total panels exposure (no shades) Solar panels lay flat on the ground. This position ensures maximum energy harvest System ensures fast retraction time making it safe in all weather conditions

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Folded Solarcontainer is compact and easy to off-load and unload. By removing all outer structural parts we ensure total panels exposure (no shades).

Once the user pulls out the foldable photovoltaic panels from the mobile solar container, powering up equipment and properties with green energy follows suit, and this can be done almost anywhere ...

The base of the Solarcontainer is a solid floor frame with the length and width of a 20f HC container. Mounted on this frame is the innovative PV rail system and the clever folding mechanism of the solar panels, which enable the transport dimensions and lifting points of a standard 20f high cube container, but still contain a maximum of highly efficient solar panels.

196 PV modules. The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time. 130 kWp output

Folding photovoltaic panel containers are designed to be highly flexible. Photovoltaic panels can be folded and stored inside the container, taking up very little space during transportation and storage. Once you arrive at your destination, the photovoltaic panels can be unfolded and start generating electricity quickly with a simple operation.
