

What makes the Anker magnetic power bank unique?

The magnetic power bank from Anker snaps to your phone and stays connected even in a cargo pocket or your best backpack. You get the benefit of not needing to bring a charging cable and a continuous charge while you use your phone.

Does Anker power bank lose charge in cold weather?

The PowerCore Magnetic 5K did not lose any charge in cold weather, which aligns with my experience using other Anker power banks in similar conditions. It's a great size for everyday carry, super lightweight, and charges a phone quickly using a USB-C charger.

Is the Anker PowerCore a good power bank?

The Anker PowerCore performed well in our tests, including a timed charge and field use. One of its standout features is how fast it charges, bringing it from dead to fully juiced in just a few hours.

What do mAh and wattage mean in power banks?

In power banks, mAh (milliampere-hour) is a measurement of power over time, indicating the battery's capacity. A typical smartphone requires 3,000 to 5,000 mAh to be fully charged. Wattage, on the other hand, measures the rate of energy transfer. Higher wattage in portable solar chargers means they can provide more power to your devices.

A decisive criterion when you want to buy an outdoor power bank is protection against water and dust. IP65 certification means that the power bank is completely dustproof and protected against water jets from any angle. This feature is important because a power bank that is waterproof is protected against rain and other precipitation.
