

Uninterruptible Power Supply Tower

What is an Eaton ferrups tower ups?

The EATON FERRUPS TOWER UPS (Ferrups Uninterruptible Power Supply Systems) is purpose-engineered for demanding applications such as 911 centers, global military installations, marine vessels, and other mission-critical applications that demand an industrial UPS system that is also a high quality power backup system for sensitive equipment.

What is a tower ups?

Designed to protect sensitive equipment from adverse electrical conditions, a Tower UPS utilizes a small form factor design. This smaller size makes them perfect for desktop or floor mounting applications where space is constrained. These systems are rugged in design and designed for easy maintenance such as easy access for replacement batteries.

How to connect a tower ups to a PC?

The tower UPSs of the indicated power include the bypass switch useful for putting the device into maintenance mode. By purchasing UPS IST3 (1-10 kVA), compliant with the UPS CEI016 standard, the USB card is included in the price. It allows you to connect the UPS to all latest generation PCs via the appropriate port.

What is ist3 single-phase UPS?

IST3 single-phase UPS (1-10kVA) are AEC's range of Online UPS double conversion and are Online tower UPS in powers starting from 1kVA up to 10kVA. The UPS IST3 series adopts the most innovative IGBT technologies, guaranteeing an efficiency of up to 96% and an output power factor of unity.

What is the difference between Tower & rackmount ups?

Compared with the traditional tower UPS structure, rackmount UPS has its advantages of simplifying layout between racks, utilizing space, saving space, and integrated monitoring and management. There is also tower & rackmount design UPS which can achieve tower-rackmount conversion.

Which ist3 ups is right for You?

IST3 is the right product for various uses: UPS for electrical substations (compliant with the UPS CEI016 standard) UPS for shops. This type of UPS is ideal for the protection of payment systems in commercial activities, such as cash registers, ATMs and automatic payments in shops. AEC suggests a 3kVA double conversion UPS for shops up to 500m².
