

Uninterruptible Power Supply for Foreign Enterprises in Benin

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

What are the different types of energy transformation in Benin?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Benin for 2022. Another important form of transformation is the generation of electricity.

How did the World Bank help the Benin power system?

The World Bank financing helped establish N-1 security in the Benin power system, a technical but critical component to power grid resiliency and efficiency. Over 1,500 farmers received training on improved carbonization and logging in the area under the forest management plan.

Why did IAME support Benin's growth strategy for poverty reduction?

IAME supported Benin's Growth Strategy for Poverty Reduction (2007-2009), which indicated reliable power supply--especially covering rural areas and northern regions of the country--as a key focus area. The project aimed to improve lighting and appliance efficiency in urban areas for households that already had access to electricity.

Why is Benin's electrification rate lower than sub-Saharan Africa's?

Inadequate energy supplied to higher rates of wood fuel and charcoal utilization that contributed to deforestation and adverse impacts on the environment. Overall, the nationwide electrification rate in Benin remained lower than sub-Saharan Africa's average rate. Approach
