What Is a Uninterruptible Power Supply (UPS)? A UPS, or a uninterruptible power supply, is a device used to backup a power supply to prevent devices and systems from power supply problems, such as a power failure or lightning strikes. A UPS can help prevent power supply problems that can often occur

Therefore, often a UPS and EPS are used in combination, if an uninterruptible power supply is also necessary over several days. It has to be noted, that applications with very high safety demand may also keep the generator warm 24/7, or even running all the time (which is an awful waste of energy).
