Our product ranges extend from small standalone 400 VA offline UPS units to large and unique, three-phase, high-efficiency UPS power plants of up to 8 x 800 kW monolithic blocks, supplying 6400 kVA ...

An uninterruptible power supply (UPS) is an enhanced battery system that activates itself in the event of a power failure and acts as the primary power source until electronic equipment can be safely shut down. The purpose of a UPS is to maintain consistent power levels and prevent fluctuations that could damage digital or mechanical equipment.
