CWO containers are used shipping containers that could still be CSC certified (International Convention for Safe Containers) for overseas shipment, and stacked up to 7-high on container ships. Cargo-worthy containers are generally in similar cosmetic condition to WWT containers (though, CWO units tend to be a couple years

newer, on average).

A refrigerated container, commonly known as reefer, is a type of container used to transport temperature sensitive cargo. Reefers are stacked at specially designed platforms that provide electric supply and can allow easy access for plugging and unplugging operations. A reliable power source and effective monitoring ensure cargo integrity.
