We service Los Angeles, San Diego, Orange County, San Francisco ...

The first step to wiring an outbuilding is to figure out how many lights and outlets you need. If your needs are modest, you may be able to tap into an existing outlet in the main house and extend the circuit from it. Calculate the total loads for the existing circuit and the extension to see if the circuit has enough capacity.

Rules for Outdoor Cables and Conduits . Even though standard NM cable has a vinyl outer jacket and waterproof insulation around the individual conducting wires, it is not intended for use in outdoor locations. Instead, cables must be approved for outdoor use. And when using conduit, there are additional rules that must be followed.

In the global market, the core manufacturers of outdoor power supply include ECOFLOW and Hello Tech etc, and the top 2 manufacturers account for about 60% of the market share. The market include North America, Asia Pacific and Europe, with a share of 51%, 27% and 18%. ...

When it comes to staging an outdoor concert or festival, you'll need to select a stage that best suits your needs -- size-wise, budget-wise, etc. Depending on your budget and what kind of show you're putting on (a single artist or multiple acts), you may need a more elaborate set-up than a smaller one-off gig requires.

Power supply specs should include a safe operating temperature range. It is best to operate within this and make sure not to stick your power supply somewhere where heat can build up and go above this maximum operating temperature. It is generally a bad idea to stick a power supply in a tiny enclosure with no ventilation system.

My band will be playing an outdoor gig and the only power source will be a generator provided by the promoter. We have a Mackie 1200 watt PA, keyboard and vocals going through the PA, 300 watt bass amp, 35 watt guitar amp. What size generator should the promoter provide to make sure we have...
