

Which brand of container generator is good

What type of generator is used for refrigerated shipping containers?

o Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

Why should you choose a containerised generator?

Power Management: Synchronisation capabilities for multi-generator setups. Our containerised generators provide critical power backup for MOD, HS2, HMP sites, as well as for sectors like construction and agriculture. These sets are particularly suited for M&E contractors, offering reliable and efficient power solutions for demanding applications.

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.

Do you need a commercial generator for a shipping container?

When your company's future, your patients' wellbeing, and the perishable goods in your inventory are all on the line then you can't risk a power outage. A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick?
